

How To Make Your Milk Jug Trash Collector

KIDS OCEAN DAY

Adopt-A-Beach Clean-Up

Materials Needed:

- Plastic 1-gallon milk or water jug with handle
- Scissors

Directions:

Step 1: Wash and dry plastic jug

Step 2: With the scissors, make an incision at the top of the jug below the neck and above the handle. Cut off the top of the jug in an oval shape (see picture below) without cutting the jug's handle. Cut the plastic jug on a stable surface in order to prevent any accidents.

Step 3: Go clean the beach! You are now ready to use your plastic jug as a collector for cigarette butts and other small pieces of trash you may find on the sand.

Step 4: Optional. Put holes in bottom of jug to make a sand sifter.
